Apples Class

Dear Parents,

Literacy We are learning to read sentences fluently by recognising high frequency words and tricky words. Please listen to your child read at home and ask them questions about what they have read. We are learning how to use a other's writing to help us with our own. We will be more independent in our writing. Please encourage them to complete their spelling homework to speed up their writing.

Understanding the World

We are learning to:
Look at minibeasts and their life cycles, use technology to produce a piece of work, find out about different countries and lives of people in those countries.

Mathematics

In maths we are learning how to compare different weights, lengths and widths and to use the right vocabulary. E.g. long, longer, longest, narrow, wide, heavy, light. We are also using numbers within 20 and above to solve adding, subtracting, doubling, halving and grouping problems.

PE We are learning about how our body works and how to stay fit and move effectively.

Effective learning skills

To review our work and change things to improve it.

PATHS this means **Providing Alternative THinking Strategies**. We are learning to think about how it feels to be someone else and how our actions might make them feel better or worse.
