Construction work

...At the North Denes Primary School Project

MORGAN SINDALL CONSTRUCTION

During the summer holidays, work will commence on site for the new North Denes Primary School. Due to this, there will be some changes to the way the current school is accessed at drop off and collection times and during the day.

Please read below for further information

Morgan Sindall is a leading UK construction, infrastructure and design business working for private and public sector customers on projects from £50k to over £1 billion.

This ranges from small refurbishments to complex construction and engineering projects
across the commercial, defence, education, energy, healthcare, industrial, leisure, retail, transport and water markets

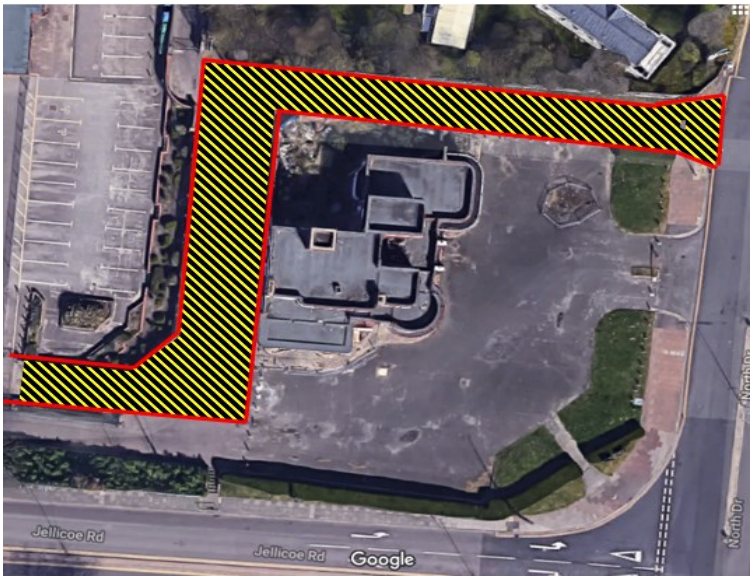
Parking:

There will be strictly **NO PARKING** within the school grounds or along the access roads beside the Iron Duke leading up to the school (see image on right).

This area will need to be kept clear at all times to allow access for delivery vehicles and construction traffic.

Fencing and gates will be erected to prevent access to these areas and there must be no parking in front of the site gates to ensure access is kept clear at all times.

For school drop off and collections by car, please park along both Jellicoe Road and North Drive and use the public footpaths to access the school gates.



School Access:

Access to the main school gates will remain unchanged at normal drop off and collection times. Please access from Jellicoe road using the steps and segregated walkway already in place.

Note that the access around the Iron Duke will be blocked off due to this being the new construction route (as above).

Access to the school during school hours will be via a new fenced walkway from the school boundary leading up to the intercom system for reception at the school (as image on the left). A ramp will be installed to allow clear access for pushchairs etc.

Safety is our main priority throughout the entire construction process and Morgan Sindall staff will be will be working hard to ensure everyone is safe. However we also require everyone around us to be aware and vigilant to these new surroundings, so please be alert at all times.
